

(Jira)

EXPERIMENT 1:

Create a Kanban Board to Visualize the Tasks.

- 1) Create Columns for To Do, In-Progress and Done.
- 2) Add Atleast 5 Sample Tasks
- 3) Move the Tasks across the Columns to Simulate the Workflow.

Aim

To create a Kanban Board in Jira Software, add sample tasks, and move them through different workflow stages to simulate software development.

Software Requirements

- **Software:** Jira Cloud (Web Application)
- **Web Browser:** Google Chrome or Microsoft Edge
- **Internet Connection:** Required

Theory

Jira is a project management tool used to track software development tasks. A Kanban Board displays work in different stages such as **Backlog**, **Selected for Development**, **In Progress**, and **Done**. It helps teams organize tasks, monitor progress, and improve collaboration.

Procedure

Step 1:

Open a web browser and visit Jira Cloud. Sign in with your account.

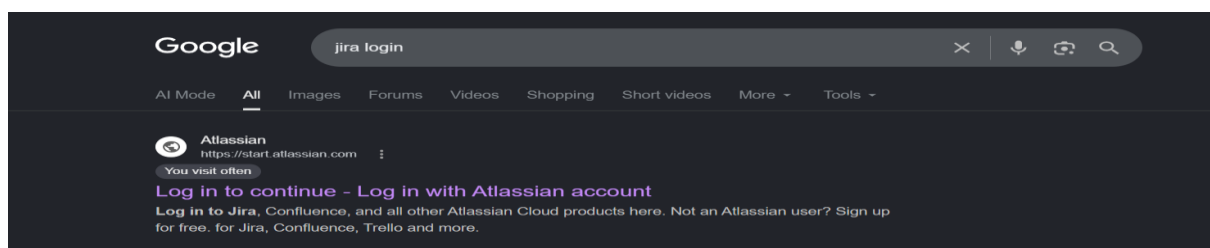

Figure 1. Opening Jira Cloud.

Step 2:

Open the **Jira** workspace from the left panel.

Step 3:

Click **Create Space** to create a new project.

Step 4:

Select **Software Development** as the category and choose the **Kanban** template. Click **Next**.

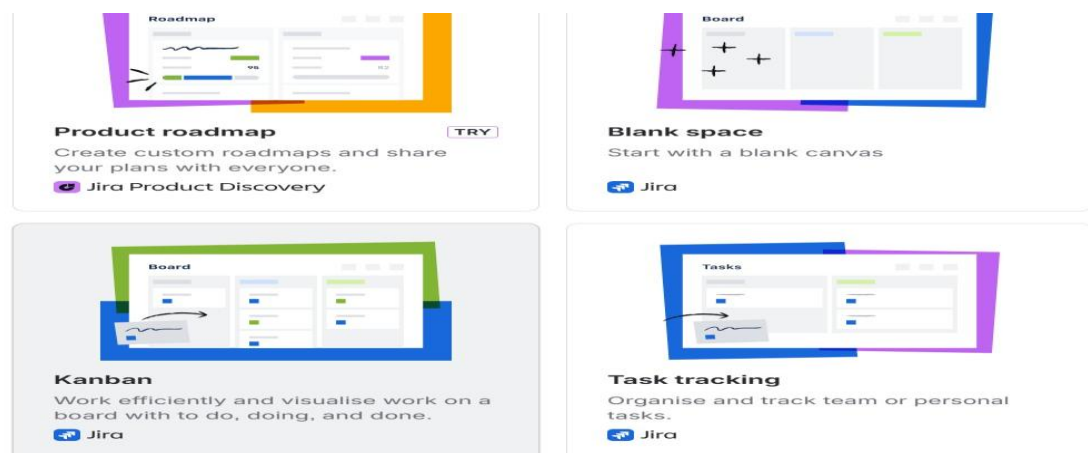

Figure 2. Selecting Kanban Template.

Step 5:

Enter the following details:

Choose **Company-managed**.

Enter:

- **Project Name:** JNM

Click **Create Project**.

Click **Next**.

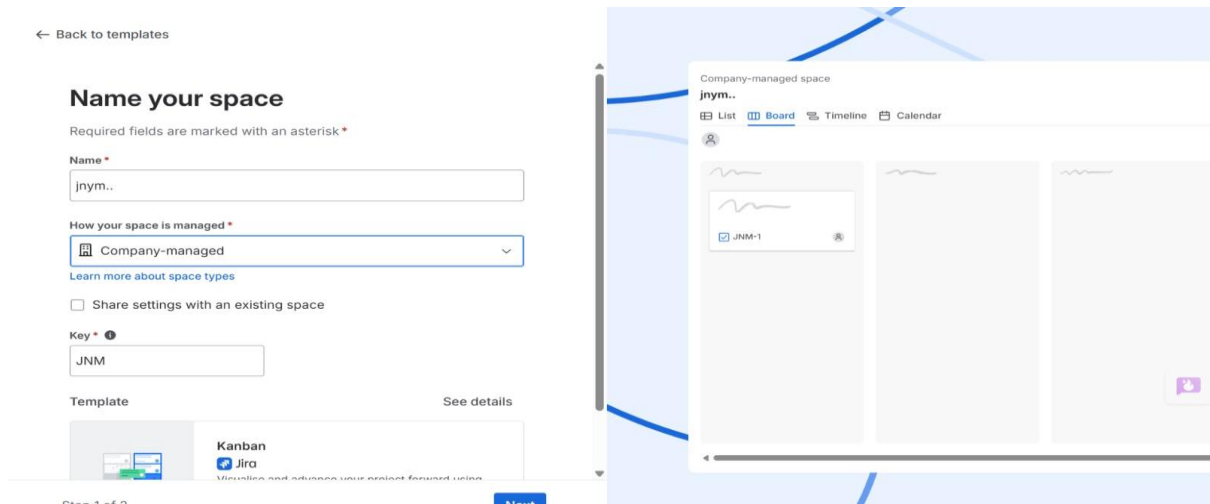

Figure 3. Entering Project Details.

Step 6: The Kanban Board is created with the workflow columns:

- Backlog
- Selected for Development
- In Progress
- Done

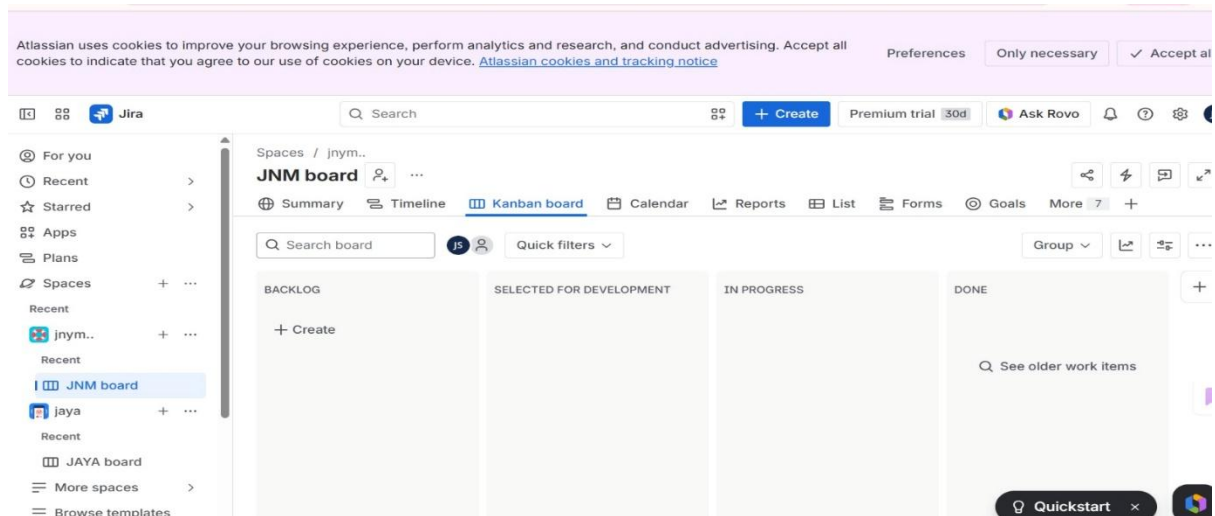

Figure 4. Created Kanban Board.

Step 7:

Add 5 Tasks

Click Create.

Task 1, Task 2, Task 3, Task 4, Task 5

Click **Create**.

Step 8:

View the Board

All five tasks will appear under **To Do**.

Step 9:

Move the Tasks

Drag and drop the cards.

Move:

To Do

To In Progress

To Done

According to the status of each tasks.
