

(Jira)

EXPERIMENT 9:

Create a Scrum Project in Jira.

- ☐ Add a backlog with at least 5 items (e.g., "Create user registration page", "Develop API for login").
- ☐ Prioritize the backlog and create a 1-week sprint.
- ☐ Move backlog items into the sprint and start the sprint.
- ☐ Finally show the Screenshot of the sprint board at the start and end of the sprint.

Aim

The objective of this experiment is to create a Scrum Project using Jira Software, add backlog items, create and start a sprint, and simulate the Scrum workflow by moving tasks through different stages.

Software Requirements

Software: Jira Cloud (Web Application)

Web Browser: Google Chrome / Microsoft Edge

Internet Connection: Required

Theory

Jira Scrum is an Agile project management tool used to manage software development through sprints. A Scrum project consists of a product backlog, sprint planning, active sprints, and task tracking. It helps teams prioritize work, collaborate effectively, and monitor project progress.

Procedure

Step 1:

Open a web browser and sign in to Jira Cloud using your account.

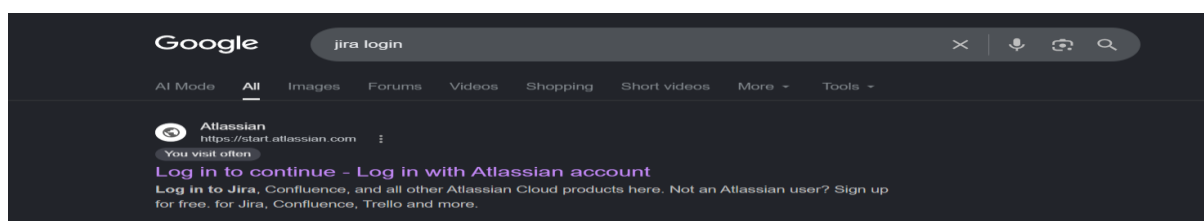

Figure 1. Opening Jira Cloud.

Step 2:

Open your Scrum project and click the **Backlog** tab.

Step 3:

Click **Create** and add at least **five backlog items**.

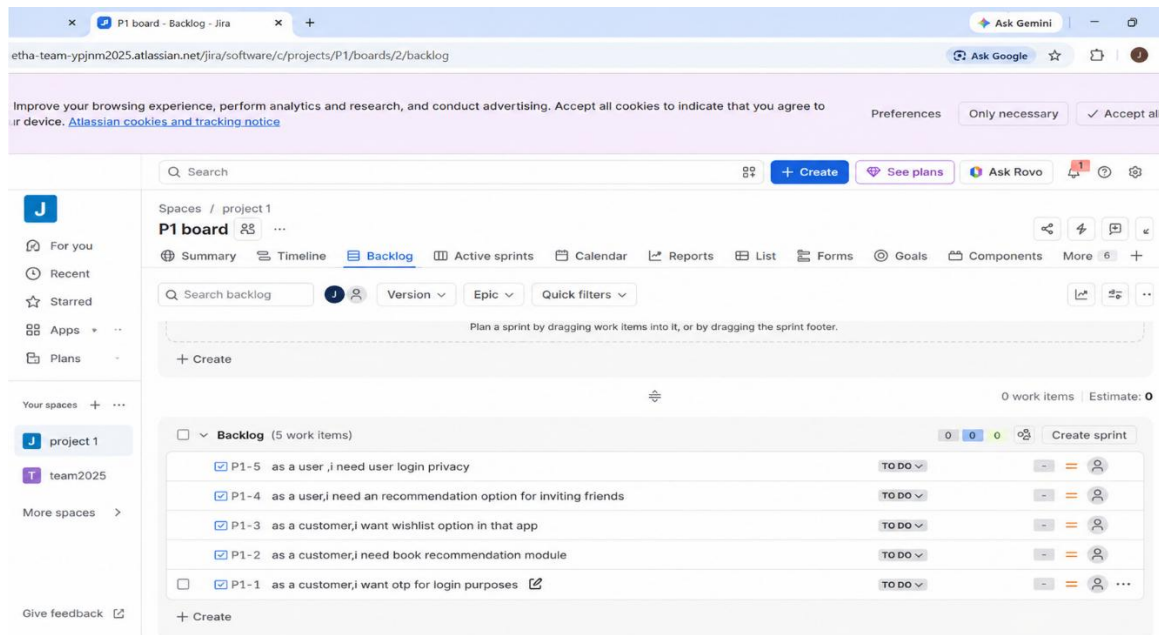

Figure 2. Creating Backlog Items.

Step 4:

Arrange the backlog items by priority using drag and drop.

Step 5:

Create a new **1-week Sprint** (or use an existing sprint) and move all backlog items into the sprint.

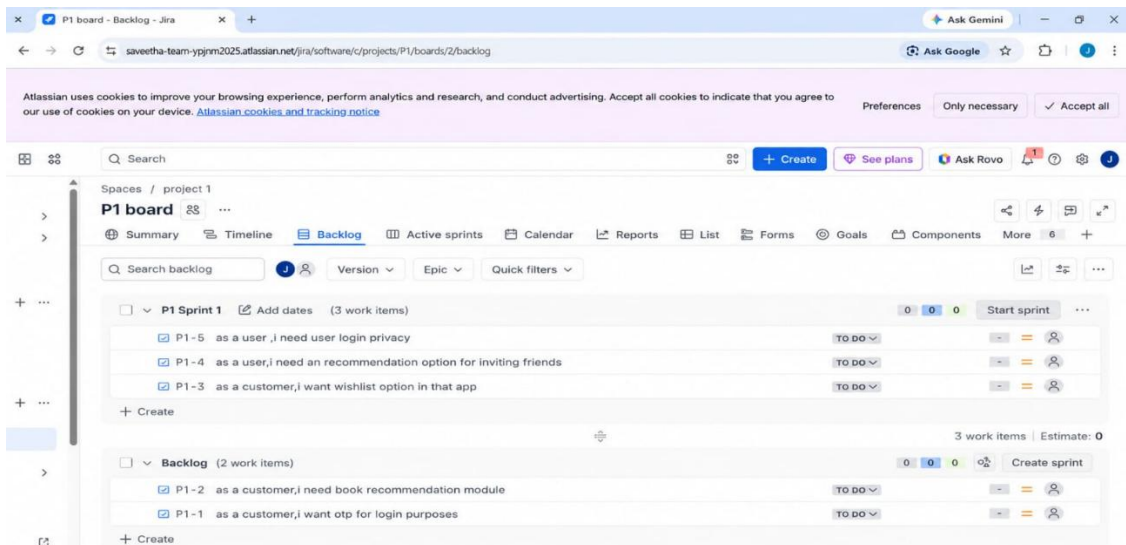

Figure 3. Creating a Sprint.

Step 6:

Click **Start Sprint** to begin the sprint.

Step 7:

Open the **Active Sprints** tab to view the sprint board.

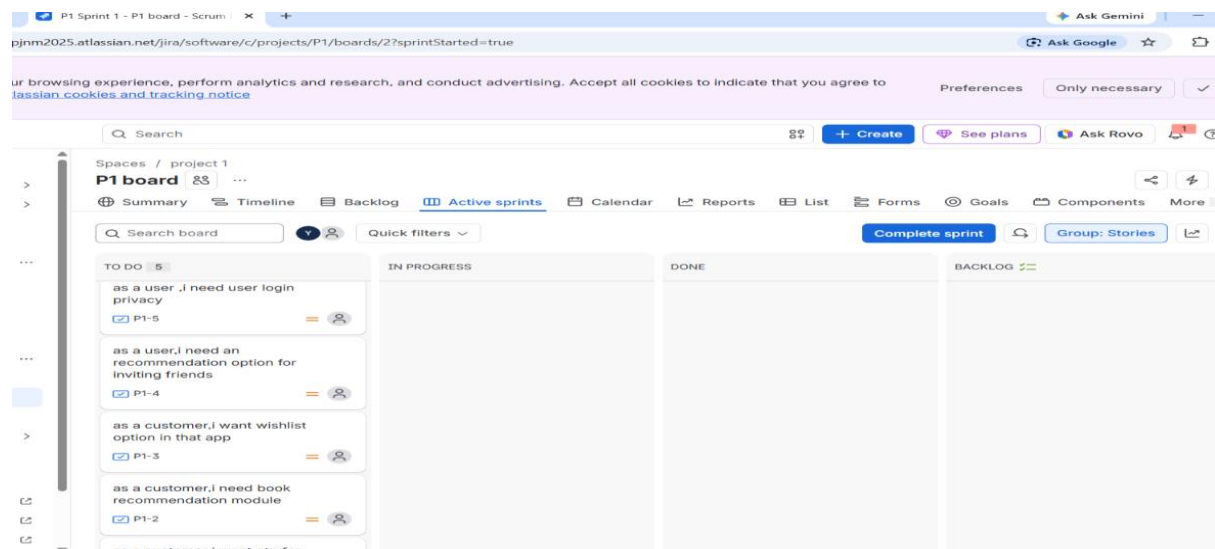

Figure 4. Active Sprint Board.

Step 8:

Move tasks across the workflow stages:

- **To Do**
- **In Progress**
- **Done**

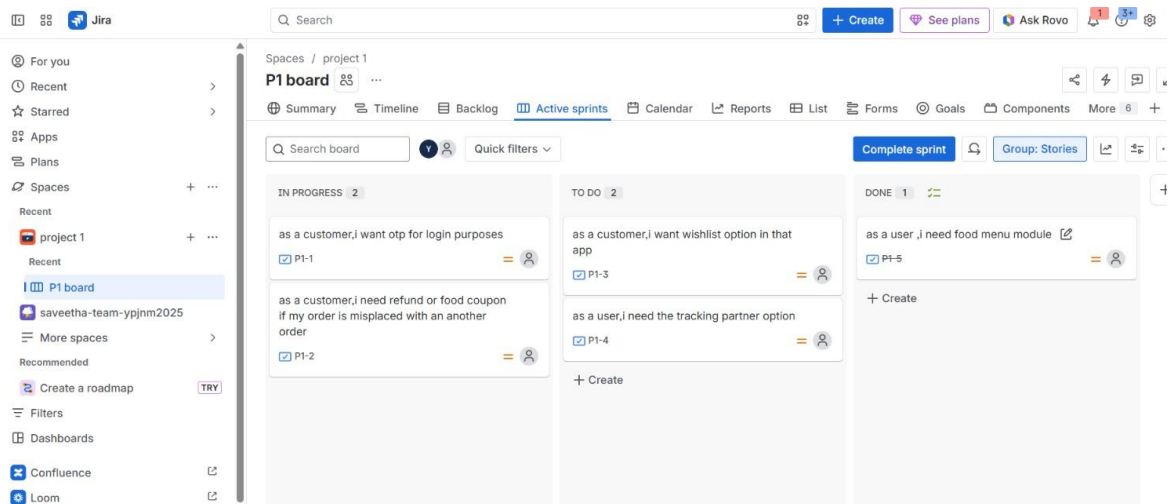

Figure 5. Completing the Sprint.

Result

The Scrum Project was successfully created using Jira Software. Backlog items were prioritized, added to a sprint, and moved through different workflow stages. The experiment demonstrated sprint planning, task tracking, and Scrum workflow management using Jira.
